Ambrosia, Ciszak Dalmas

Ambrosia, Ciszak Dalmas

The starting point for the Ambrosia was to revive the traditional Linestra-style lamp – to update it and show that a technical and resolute design can also be poetic.

Inspired by the Linestra's original "line of light," Ciszak Dalmas have created a modular system that can be adapted to fit any space.

Babila, Marco Zanuso Jr.

Babila demonstrates that, when it comes to a design, the material can be as important as the shape. This new outdoor wall sconce is of polished stainless steel, a circular object that produces a panoramic effect, reflecting its surroundings. It is not designed to be an architectural element, but rather a simple and beautiful design that draws attention, whether on or off, as it allows us to catch a glimpse of the daily life occurring around it.

Bicoca, Christophe Mathieu

Bicoca. Christophe Mathieu

The Bicoca is born with the optimism of brightening life and accompanying the good times, wherever you go. This new colorful, lightweight portable lamp projects an intimate light that adds warmth to all your personal spaces.

Made of polycarbonate, Bicoca begins with an overlay of basic geometric figures, with a tiltable shade to direct the light. Two accessories increase the applicability and versatility of the lamp.

Bohemia, Joan Gaspar

At first glance, the Bohemia appears to be made of blown glass. However, the lamp's large size ruled out that material. Instead, the designer settled on polycarbonate to create an exciting, organic, translucent profile that integrates two volumes into a single shape. The design allows for a large shade in different colors with a white interior for pristine reflection.

Bohemia, Joan Gaspar

Bolita, kaschkasch

A technologically innovative design that brings back the sense of touch. Moving the Bolita dims or boosts the light, an interplay that captivates with its beautiful visual effect. Bolita seeks out that user interaction.

The idea of Florian and Sebastian at the kaschkasch studio was to design a lamp in which the dimming process was mechanical and not electronic.

Cala, Joan Gaspar

The beauty exuded by the Cala stems from its simple, synthetic and essential form: a shade that embraces the light without containing it, letting it escape to yield very warm lighting.

With a structure made of oak or black lacquered metal, the Cala is an iconic Marset design defined by that most valuable of pairings: form and function.

Chispa, Joan Gaspar

Its design evokes a high-quality garage lamp, lightweight and useful, with three dimming levels. It's sophisticated and warm, decidedly designed to accompany.

Its structure is protected by a grid that revolves around the light source, an original touch. A built-in hook in the base allows it to be hung via the included cord.

Cluster, Accessory

For use with our 24V pendant fixtures: Dipping Light 24V and Ginger 20 24V. For cluster canopy installation, take into account the canopy's max wattage and number of wire entry points. The total wattage of the selected pendants cannot exceed the max wattage of the canopy, and the number of pendants cannot exceed the number of wire entry points of the canopy.

Circular Canopy 20W

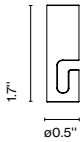
Product notes: This accessory is included when purchasing the 24V pendants.



The Copernica collection consists of desktop and floor lamps that use counterweights of mixed materials and density, such as steel and aluminum, allowing one to move the lamp with great precision and providing a wide range of heights, distances, and adjustments to suit one's taste. The Copernica draws minimalist structures in space, as if it were a canvas, and the carefully selected color schemes add soft chromatic touches to the ensemble.

Dipping Light, Jordi Canudas

Dipping Light, Jordi Canudas

Beyond its function as a lamp, the Dipping Light seeks to excite. When it's turned on, its different shades of paint sift the light, creating a magical ambient effect. When it's off, its colored glass sphere is an object charged with beauty, and an eye-catching design piece for a shelf, bedside, or table. The various layers of paint draw concentric circles and capture the light, moderating its intensity. The paint becomes the shade, colouring and texturizing the light.

Discocó, Christophe Mathieu

Djembé, Joan Gaspar

Using a rotomolding technique allowed the designer, Joan Gaspar, to design a fixture with vastly different interiors and exteriors: its outside recalls the texture of a stone, giving off a perception of great weight, emphasized by its volume. In the spacious interior you'll find a smooth, white space perfect for the reflection of light. Djembé is a lamp designed for use in public spaces that seeks to bring beauty and an unbeatable quality of light.

FollowMe Inma Bermúdez

Portable and rechargeable, FollowMe is a table lamp that can be taken wherever you go.

Because of its small, warm, and self-contained character, it is ideal for home, restaurants, terraces, or to replace candlelight.

Funiculí, Lluís Porqueras

Funiculi is a revamped edition of a lamp originally designed in 1979. Lluis Porqueras always sought an absolute simplicity in his designs, stripping everything superfluous to leave only the essence of the simple, useful object.

Using the same double-clip mechanism of the original, this scaled-down model allows easy height adjustment and 360 degree shade rotation to fit the needs of any room or user.

LED-Ginger, Joan Gaspar

LED-Ginger, Joan Gaspar

Wood is a great ally of cozy lighting. It is a material that is hard to mold, a challenge that the LED-Ginger collection neatly resolves. The combination of sheets of wood, paper and resins pressed together under high pressure achieves a laminate that appears almost entirely flat, which discreetly lights up spaces with indirect light. The LED-Ginger collection has been expanded over time to provide solutions to different lighting needs.

LED-Ginger Outdoor, Joan Gaspar

LED-Ginger Outdoor, Joan Gaspar

The LED-Ginger collection is moving outdoors, with numerous sizes of wall sconce and bollard as well as a large-scale lamppost style light. This outdoor collection also introduces a unique new rust brown finish, with a deep, warm glow, alongside the standard black-white metal finish familiar to the indoor version.

High Line, Josep Lluís Xuclà

The High Line is a light sculpture, a svelte form that emits light without revealing its source. The floor lamp by Josep Lluis Xucla illuminates indirectly by reflection, with a twist: the High Line's ally is not the ceiling but the wall, and they want to remain close. Formally, the High Line is a composition of volumes and forms.

Ihana, Joanna Laajisto

In search of the beauty of light, Joanna Laajisto created a sculptural lamp defined by its pure, almost graphic forms, and by the balance between rigidity and fragility.

Offering the option of ambient light for any classic or contemporary interior design project, this modular collection can be used to create light compositions.

Jaima, Joan Gaspar

Through the language of textiles, Joan Gaspar has designed a light of flexible, ductile materials that sifts the light as readily as it moves with the wind. In the Jaima collection, the light is the shade and weaver of emotions.

This collection takes its name from the bedouin tents of North Africa, and is inspired by their varied fabrics and forms.

Ledtube, Daniel López

Its ergonomic design beckons you to move it in any direction, up to 360º, and its use is very intuitive. When opened, it turns on automatically; when closed, it turns off and hides away in the wall, like camouflage. It's so versatile it can be installed vertically or horizontally, adapting to the needs of your space. Now we present a new surface edition, just as functional but more compact. The switch is integrated in the base, maximum ergonomic design, with absolute flexibility to move it in any direction.

Manhattan, Joan Gaspar

The main virtue of this geometric collection of wall lamps is the rationality of its design and its ornament-free look. An interior silk-screened polycarbonate film diffuses the light, and the fixture's shape makes it suitable for both vertical and horizontal installation, perfect for bathrooms and kitchens.

Milana, Jaume Ramírez

The Milana is a sleek, versatile form with an almost imperceptible point of light. The base lamp offers an impeccable downward-directed light--but when a shade is added, the light escapes upward,illuminating the lamp itself. An additional counterweight version gives the user complete control over the light.

Milana, Jaume Ramírez

MVV, Manuel Valls

The MVV story begins in the 1970s. This new suspension lamp is a first, and was designed but never produced by Manual Valls Verges, one of Spain's most notable architects at the time and partner of Jose Antonio Coderch for 15 years, alongside whom he undertook such prominent projects as the Ugalde house, near Barcelona. The MVV name reflects Vergés' initials, as a way of displaying his authorship of this unique lamp, produced for the first time by Marset.

N. Ocho, Christophe Mathieu

The wooden sphere of the N. Ocho's lampshade is handcrafted, giving each fixture a human touch. Its smooth texture has the quality and feel of a billiard ball, while its flexible arm, covered in braided fabric, is a mainstay that improves its look without sacrificing its efficacy. The N. Ocho was designed to be placed at the head of a bed and add comfort to the bedroom, a place dedicated to restfulness, where a good book is always healthier than a sleeping pill.

Piola, Christophe Mathieu

The Piola collection is about imitating this fluidity of infinite movement, in search of a balance between the diffusion of light and the creation of shadows. The fixture's spiraling form breaks with the monotony of cleanly ordered lines, offering a different face from every angle. At the same time, the central column provides a symmetry and solidity that supports and reinforces the visual movement of the screen.

Plaff-on!, Joan Gaspar

Plaff-on!, Joan Gaspar

A good design is one that endures. So it is with Plaff-on!, a lamp that has been illuminating walls and ceilings for almost ten years. Its hand-blown white glass diffuser appears to float, detaching from the ceiling and the circumference that surrounds it, and its light filters upward to create a luminous halo. Indoors, outdoors, with or without signage, the Plaff-on! now offers multiple options in one lamp that can now conquer the outdoors as well. .

Pleat Box, Xavier Mañosa & Mashallah

The idea behind the Pleat Box is a sophisticated combination between a digitally designed crease in a piece of cloth and a silhouette that is applied to a ceramic base. The alchemy of the craft process leaves unpredictable traces, small marks in the metal glaze, tiny cracks in the polish... little flaws that mark the unique personality of every lamp.

Plaff-on!, Joan Gaspar

Polo, Joan Gaspar

The fluidity of its movements and its integrated LED technology make the Polo a light source with a great precision and versatility.

The Polo comes with a diffuser made from injected aluminum and a rotary switch located at the top of the shade.

Roc, Joan Gaspar

The Roc is a compact indoor and outdoor wall lamp with a pressed glass diffuser. Its undulating shade blurs and softens the light, creating a unique ambiance.

Roc tempts the senses. It looks like a bright block of ice, and its irregular, almost organic texture beckons to be touched.

Santorini, Sputnik Estudio

Inspired by the lanterns found on fishing boats, this collection of outdoor customizable lamps allows you to create multiple compositions. Users can choose how many shades to place on the diffuser, along with their order, position and direction. This interplay of combinations yields a rich array of direct or reflected light.

Scotch Club, Xavier Mañosa & Mashallah

The warmth of the fixture's ceramics contrasts with the faceted edges of the sphere, making it seem as if it is winking playfully. Made using a meticulous, traditional design process, the lamps are fired four times —using glazes specifically developed for this collection— and incorporate warm, high-quality materials, such as gold.

Soho, Joan Gaspar

The striking, industrial shapes in the Soho collection are reminiscent of the lamps that were traditionally used in markets and taverns, but they contrast through the use of thoroughly contemporary materials and textures.

It is made from rotation-molded polyethylene, a technique that allows us to offer it in different sizes.

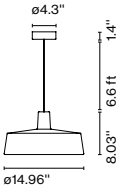
Soho 38 LED

Code	Finish
A631-235	White
A631-236	Stone grey
A631-237	Black

Materials
Shade: Rotary moulded polyethylene
Diffuser: Methacrylate opal

Dimmable: Yes
Integrated dimmer: No
Dimming protocols: Phase cut (Triac)

Product type: Pendant
Light Source: LED SMD 700mA 13.2W 2700K CRI80 1848lm
Luminaire: 100 - 120 VAC TRIAC 16W 1051lm
Weight: Net 5.5 lb – Gross 7.71 lb
Package: 17.3 x 17.7 x 9.4 " – 7.71 lb Vol – 1.76 ft^3
LED included



Dimmable

Suitable for damp locations

Cable length: 6.6 ft
Wire installation: Hardwired
Cord color: White (white version), Black (all the rest)
Canopy color: White

Soho 57 LED

Code	Finish
A631-356	White
A631-357	Stone grey
A631-358	Black

Materials
Shade: Rotary moulded polyethylene
Diffuser: Methacrylate opal

Dimmable: Yes

Tam Tam, Fabien Dumas

It's a juicy bunch of grapes, Nick Mason's drums from Pink Floyd, the constellation of Perseus...there are so many examples that could be used to describe the Tam Tam, a new perception in the world of lamps, which extols repetitiveness by focusing on the archetypal lampshade: a number of light sources pointed in different directions, geometrically arranged to invoke a feeling of organized chaos.

Tam Tam 3

Theia, Mathias Hahn

From light to shadow with a single gesture. Theia has two faces: to discover them, simply swivel the fixture around its central axis. It can be pointed towards you for use as a reading lamp, or towards an object or a wall, creating a subtle, indirect light that immediately warms the atmosphere.

Light Source: LED SMD 700mA 8.2W 2700K CRI90 913lm
Luminaire: 85 - 264 VAC 14W
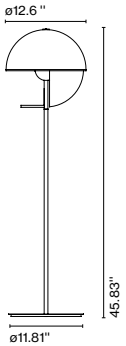
Weight: Net 15 lb – Gross 19.2 lb
Package: 14.6 x 14.6 x 9 " – 13.2 lb Vol – 1.06 ft³
42.7 x 6.7 x 4.7 " – 6 lb Vol – 0.7 ft³
LED included



Dimmer

Cable length: 5 ft
Wire installation: Plug-in
Cord color: Black
Switch location: Built-in the dissipater

TXL 2019, Joan Gaspar

Just as materials and techniques evolve, so do lamps. The TXL managed to light up exteriors with the same warmth as interiors. But “all things must change to stay the same”, and so the lamp is updated and presented with a new fabric shade.

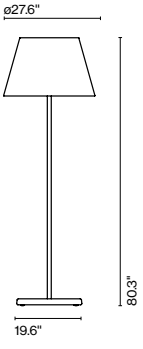
This new material better withstands adverse weather conditions and clothes the lamp in a ductile, and yet solid and resilient look.

TXL 2019 205

Code	Finish
A605-076	Beige
A605-077	Grey

Materials
Base: Concrete
Stem: Stainless steel
Diffuser: White acid etched glass
Shade: Textilene with the inner part always in white

Product type: Floor
Light source: 2x E26 LED TYPE A 11W
Weight: Net 63.5 lb – Gross 70.5 lb
Package: 16 x 13 x 13 " – 5.5 lb Vol – 1.41 ft³
27.6 x 27.6 x 19.7 " – 9.7 lb Vol – 8.8 ft³
86.6 x 3.9 x 3.9 " – 7.9 lb Vol – 0.7 ft³
26 x 26 x 5.9 " – 47.3 lb Vol – 2.11 ft³
Lamping not included



Suitable for wet locations

Cable length: 8 ft
Wire installation: Plug-in
Cord color: Black

Dimmer

Dimmer on the unit.

Dimmable

Product which can be dimmed.

Quick ship item. Always in stock, ships within 5 to 10 days.

Oversized item. Special freight policy applies. Freight assessed separately.

Prices
All prices are in USD, excluding Canadian MAP. Prices do not include tax, shipping, assembly, or installation. Lamping is included for integrated LED fixtures only.

Orders
Purchase orders will only be accepted via email. No handwritten or telephone orders will be accepted. The order will be considered definitive and Marset reserves the right to deny any changes not made within 48 hours of receipt of the Order Confirmation. Modifications include but are not limited to: information on product, availability, quantities, price, payment, transport conditions and any other questions that may arise. Marset reserves the right to reject or cancel an order for any reason. Orders over $5,000 or containing ten (10) or more of any single item will be considered Project/Contract Orders, and will be treated as distinct from a normal order. The Marset Order Confirmation or Proforma Invoice replaces any previous quotes.

Transport
Marset products ship directly from our factory in Barcelona to the U.S. and Canada only, and within Europe when required. Marset reserves the right to allow shipments to only the country in which the purchasing entity is registered. Marset reserves the right to reject shipping requests to any locations not within the U.S. or Canada. Marset orders ship on Marset accounts, and Marset cannot accommodate ex-works or third-party pickup from factory.
A majority of Marset orders ship via Fedex Express (2nd Day Air), with the breakdown as follows:

- Freight charge for orders under $1,500 net: $65 flat fee ($75 to Hawaii or Alaska)
- Freight charge for orders between $1,500 and $4,999 net: $125 flat fee (some exceptions apply, see below)
- The following items are considered oversized items, and will have freight charges quoted at time of order: Soho 112, Soho C112, Djembe 100, Djembe C100, Bohemia, Ginger XL 42, Jaima 71 pendant, Jaima 71 IP65 pendant, Jaima P207 and Jaima P307 floor lamps, as well as certain discontinued items of which Marset has stock remaining. This list is not conclusive, and new products may be added as they are introduced to our collection.
- All orders over $5,000 net may have separate air and ocean freight charges quoted at time of order or deposit. Freight quotes are valid within the same month as the ESD provided for your order; exceptions may apply for orders with extended lead times.

Orders above $5,000 whose physical volume does not meet the requirements for ocean freight may be shipped by air freight. Certain other exceptions to the above guidelines may apply.

Damaged products
Clients are required to inspect their shipment for damage or missing items within 48 hours of delivery. In case of any transport damage, the client must provide a photograph clearly showing damaged items and/or packaging. No exceptions for this requirement will be made for deliveries to jobsites or warehouses.
Please make the claim with the delivery driver upon delivery if external damage to the box can be seen. In case of damage, Marset may provide a replacement for the damaged piece or pieces, or for the entire fixture, at our discretion.

Goods Return
Subject to official authorization and approval in writing by Marset, uninstalled product in perfect condition and in its original packaging may be returned within 15 days of receipt. Returned goods must contain the reference of the return authorization. Goods must be returned within 15 days of receipt. Once the goods have been received and inspected, if approved, a credit note of up to 80% of the invoice amount will be issued within 7 days, to be applied toward a future purchase. Marset does not issue refund payments.
Marset reserves the right to reject buyer's remorse returns of orders above $5,000 net, excluding taxes and shipping, or orders of 10 items or more.

Warranty
Marset fixtures carry a 2-year warranty under normal use, valid from the date of invoice. All our fixtures display a code with the manufacturing date. Removal of the code will void the warranty. Our warranty liability includes the repair or replacement of the goods, excluding shades and light sources. The cost of installation and/or uninstalling the product and the transport fees are not included in this warranty, and are the sole responsibility of the client.
Any modification or alteration of the product by a third party, outside of those shown in official Marset installation instructions, will void the warranty, and may void the UL certification.

Payment
All orders under normal terms require pre-payment before production, and are not considered placed until full payment or requested deposit has been received. We accept payment via check, ACH, or wire transfer.
Orders over $5,000 or containing ten (10) or more items may require 50% deposit (non-refundable after 48 hours) to begin production, regardless of client credit terms.

Orders cancelled more than 48 hours after placement may be reimbursed, at Marset's discretion, via credit memo, and will include a restocking fee.
The invoice maturity date cannot be altered and any delays will be subject to the relevant administrative and financing expenses. The due date of an invoice cannot be changed by the client in case of a commercial claim, except with written authorization of Marset. Purchased products remain the sole property of Marset until full payment of invoice. This remains in effect regardless of the solvency status of the purchasing company. If purchaser is unable to pay an invoice in full, all unpaid items must be returned to Marset in original working condition.

Credit Terms: Marset may agree to grant 30-day credit terms up to $30,000 USD, for clients with whom Marset has a longstanding business relationship. Clients may be required to submit their financial information to Marset's insurer in order for terms to be granted.

For clients with credit terms, production on orders below $5,000 USD will begin upon receipt of purchase order. Orders above $5,000 USD or that contain custom items may require 50% deposit regardless of terms.
Marset reserves the right to immediately revoke credit terms for clients with a past-due invoice.

Special requests
All product customizations of any sort must be submitted beforehand and approved in writing by Marset. Marset reserves the right to request custom 2D/3D drawings of any modifications, and to refuse modifications for which drawings are not submitted. All sales of custom items will be considered final and no returns will be accepted. A non-refundable 50% deposit will be required to process custom orders.

Disclaimer
Marset reserves the right to modify any product in order to improve its characteristics, without prior notice. Marset is not responsible for any misuse or negligence by the client in the handling of the products that results in injury or worse on any persons and/or property.
Marset is not responsible for replacement of items that have been discontinued from Marset's catalogue, including spare or replacement parts for those items.
Placement of an order implies acceptance of this general sales agreement. All disputes will be subject to arbitration in New York (USA).

Technical note

The watts shown on the pricelist are the actual watts of the luminaire (including both LED and driver); otherwise, the watts are expressly shown as being for the light source. Similarly, the lumens may be for the luminaire or light source, as shown on the pricelist. For more information, you can find lighting data on our website.
